

# Smart Campus Cafe Project

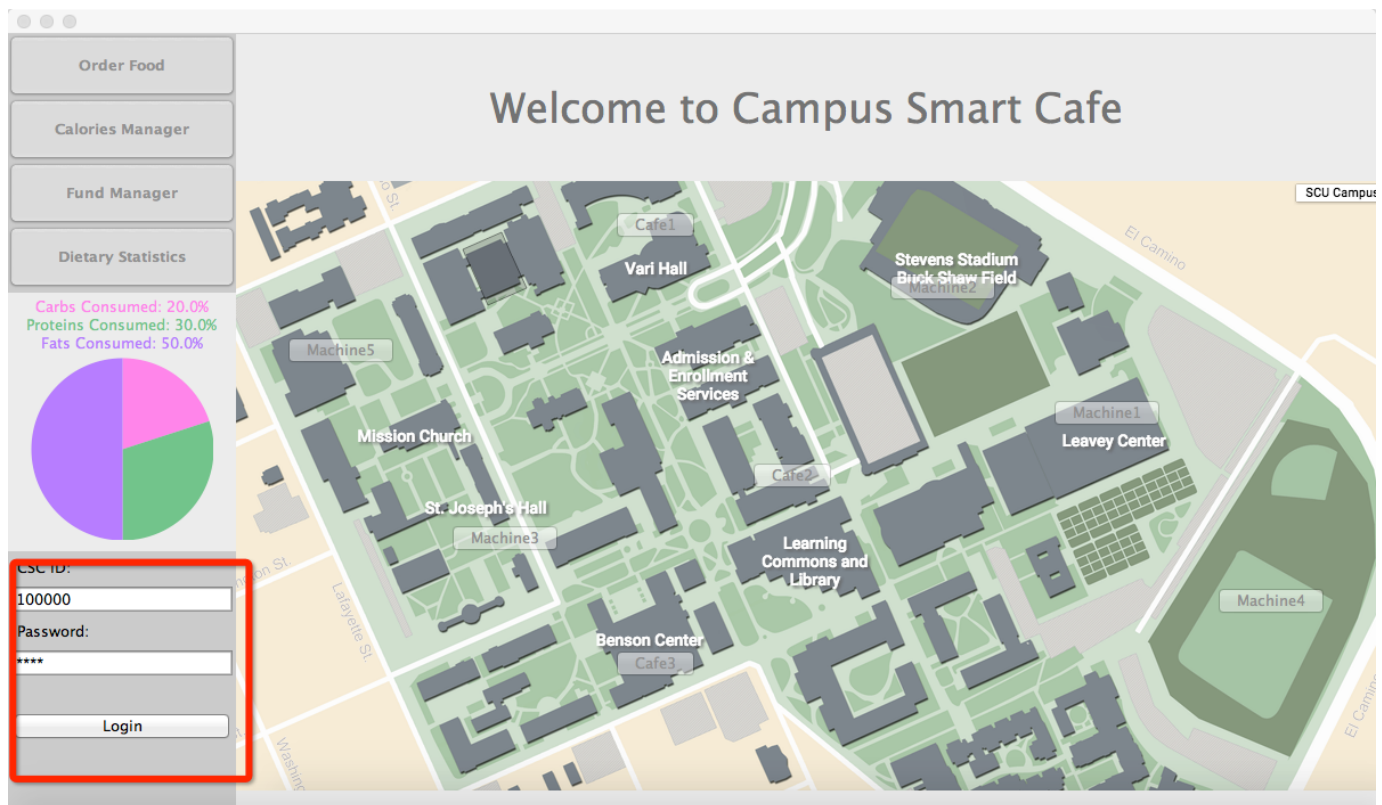

Qian Yang (W1096353)

Yishu Chen (W1094592)

## 1. Launch the application via Eclipse

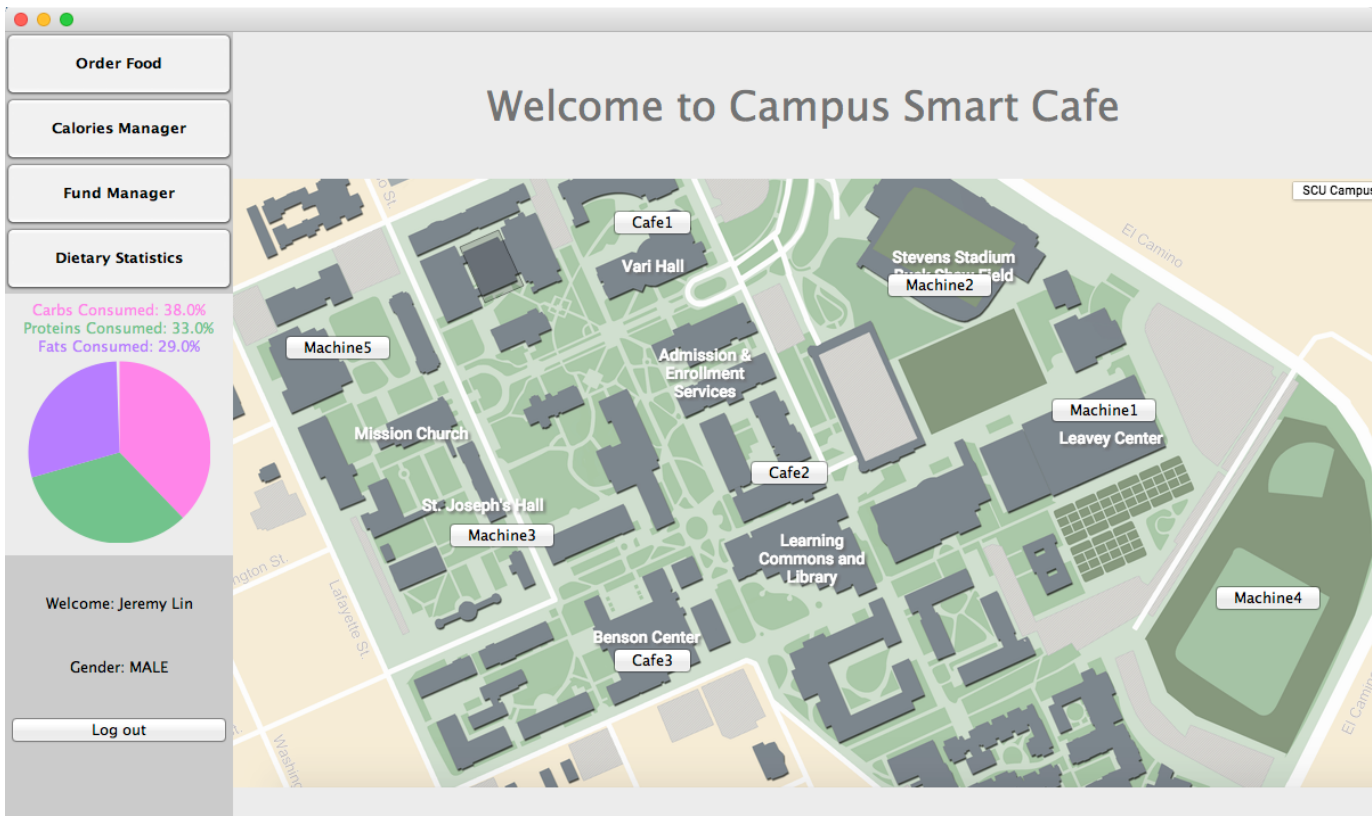

## 2. Key in the CSC ID and password to login. The features won't be enabled before logged in.

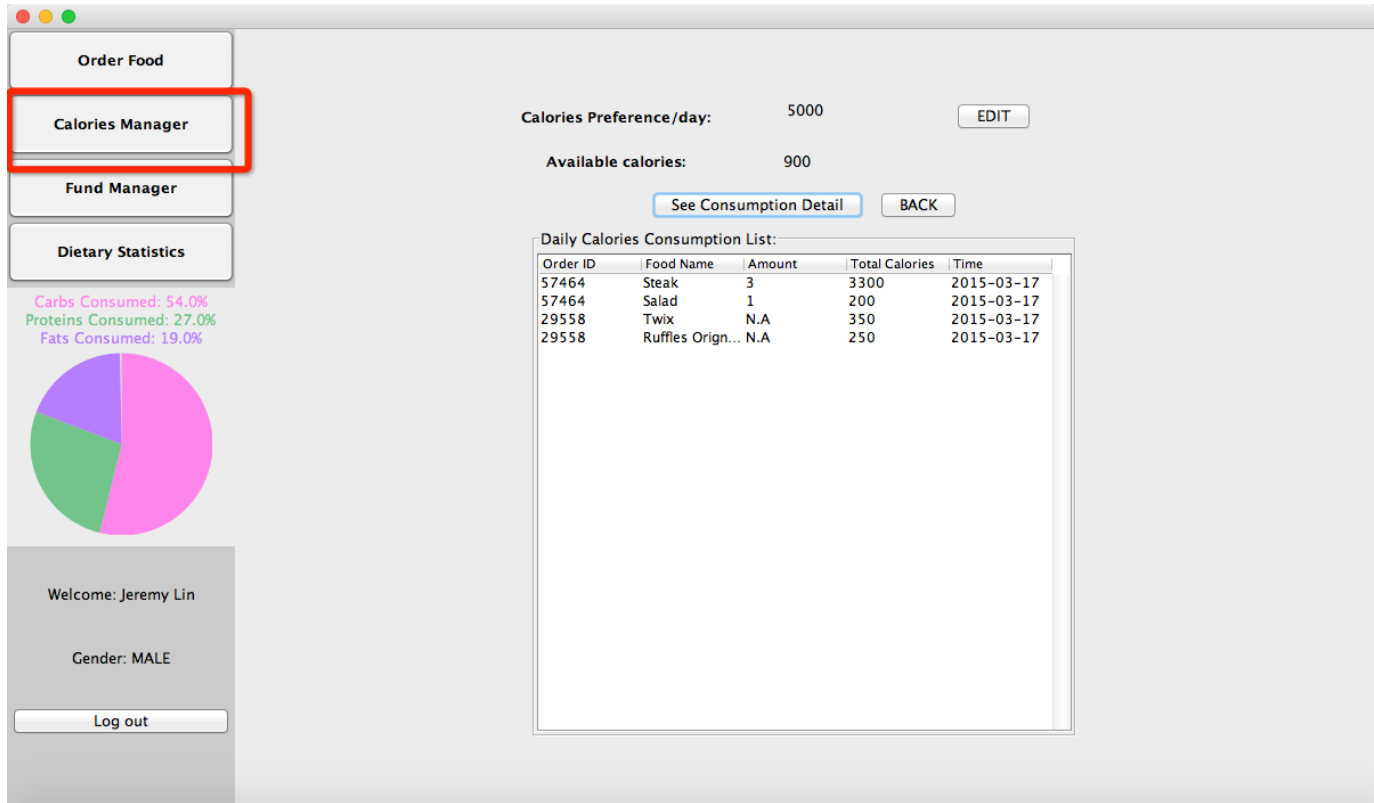

3. After successfully logged in, the user name and gender will be displayed. Also all features will be enabled. On the left section, it also shows the nutrition pie for user's intake for today. The pie chart will

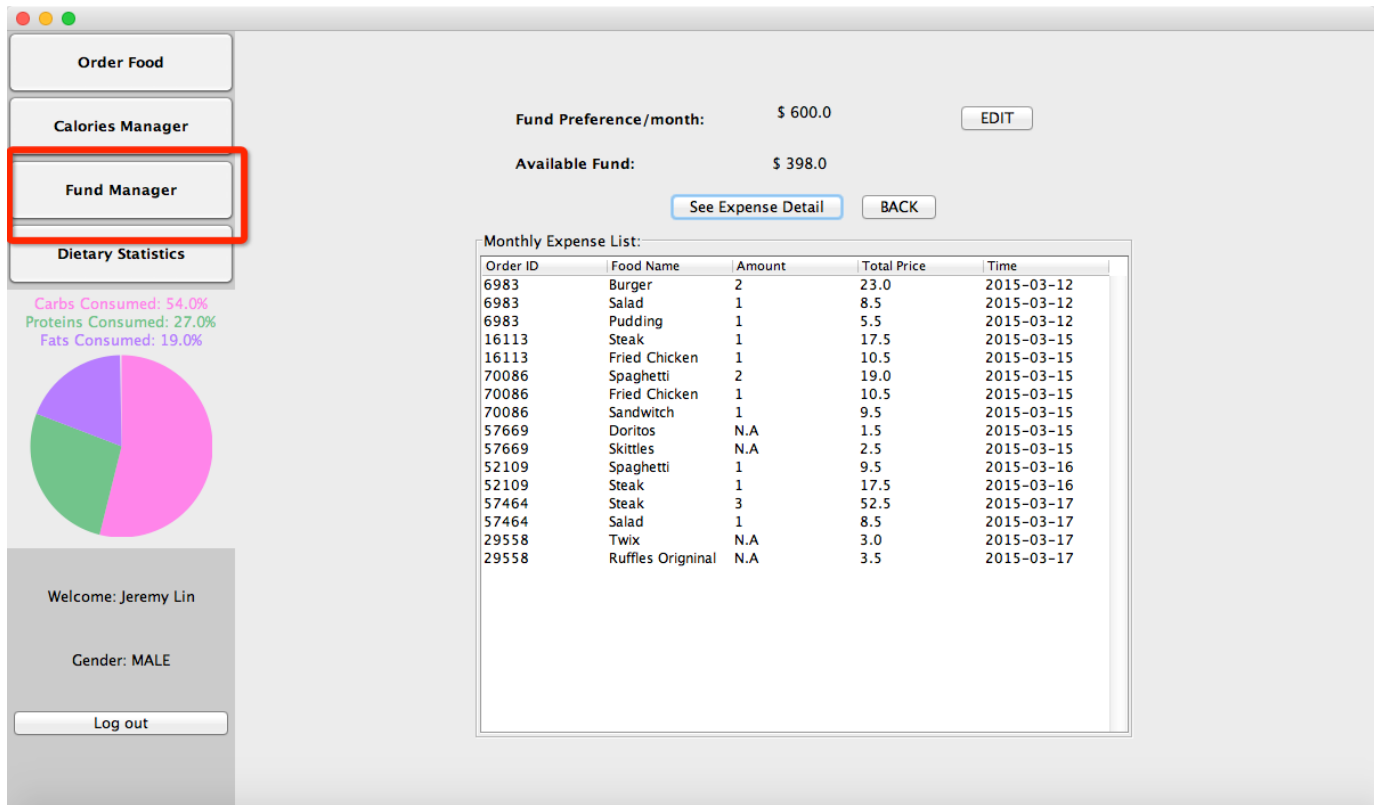

change dynamically as user orders more food.

4. User can click “Calories Manager” on the left section to view/ set calories preference. User can also view today’s purchase history and calories consumption details by clicking “See Consumption Detail” button

5. User can view/set fund preference via clicking the “Fund Manager” button on the left section. User can also view this month’s purchase history and price details via clicking “See Expense Detail” button

6. By clicking “Order Food”, user can go back to the map view and select venue to order food. Once user clicked one of the button on the map, he will be redirected to the menu page. menu page differs depends on whether user selected cafe or vending machine.

Message

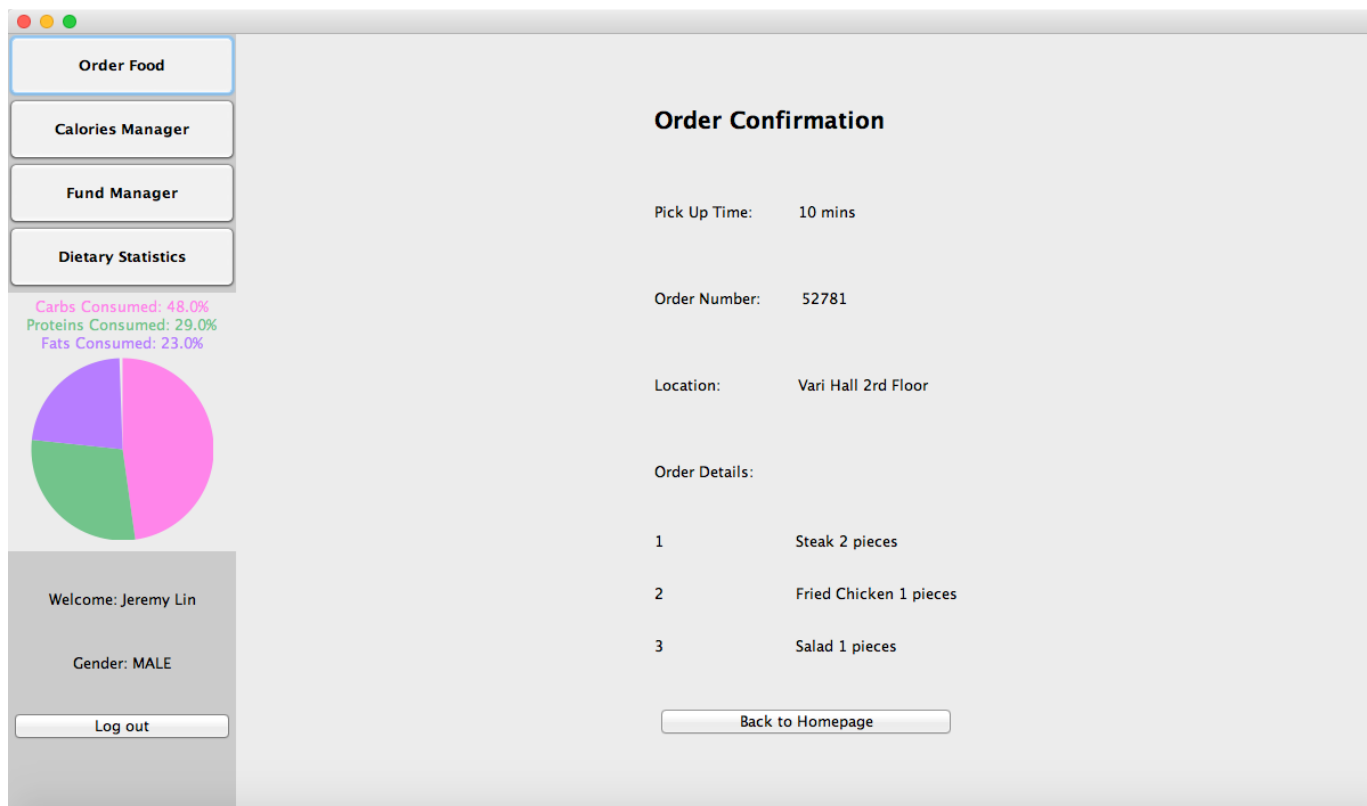

Calories quota insufficient. Set preference via 'Calories Manager'

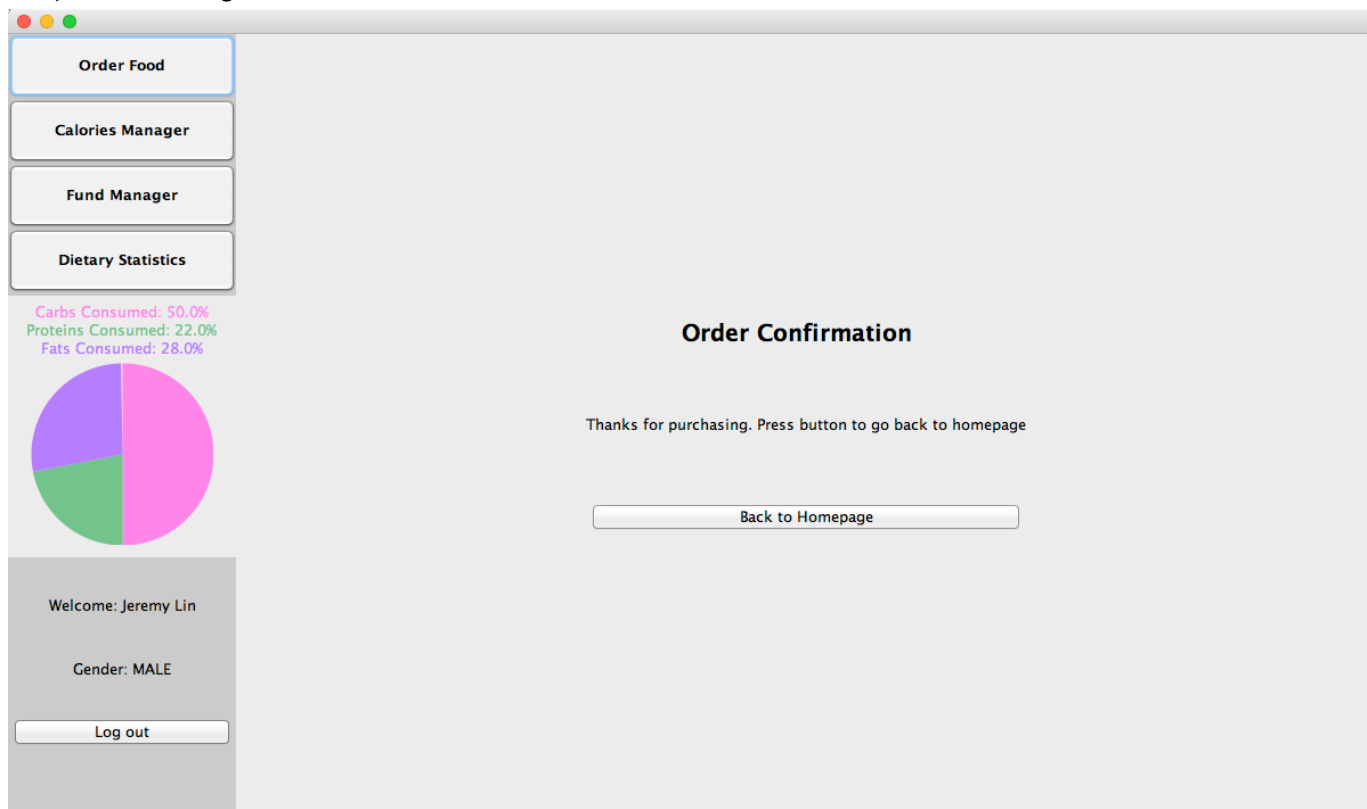

OK

8. If it meets preference setting, a confirmation page will be showed to suggest successful ordering.
- 1) for CAFE order , the pickup time, location, order id and order details will be displayed.

## 2) For Vending Machine order -

9. By clicking “Dietary Statistics” button on the left section, user can view a bar chart. The bar chart shows current date’s nutrition consumption (Calories, Protein, Fat, Carbs) for 1. all users in average (Green) 2. all users in your gender (in this case MALE) (Orange) 3. Yourself (Purple).

10. User can log out by click the “Log out” button on the lower left corner. It will logout the user from the system.
